Discussion

The onsite VOC sample results from the eastern extension of the excavation and the northern extension from that area have all been received and are below WRW ALs. PCB sample results are not yet received but are anticipated to be below action levels based on earlier sample results.

Backfill of these final areas will proceed prior to receipt of PCB sample results because of projected (and current) precipitation and potential further collapse of the northern excavation walls. HRC-X will be added with the backfill.
